SHRIKHETRA PARICHAYA

The sacred Temple of Shri Jagannath is located on the western coast of the Bay of Bengal at a distance of 90 K. M. to south of Cuttack and 58 K.M. from Bhubaneswar, on the terminus of Howrah-Puri Railway of the South Eastern Railways.

2. The Jagannath Temple is the oldest and most important pedestal, an ever lasting monument of ancient Indian culture, both religious and Philosophical. The ancient doctrines describe Puri as more imporetant than the famous Pedestals it contains. It has many synonomical names and each name has its Philosophical and spiritual importance and they are.

[1] Uchista Kshetra, [2] Uddiyan Pitha, [3] Purusottam Kshetra, [4] Jamanik Tirtha [5] Kushasthali, [6] Sankha Kshetra, [7] Niladri, [8] Shrikshetra, [9] Martya Baikuntha and [10] Puri. Utterance of these ten names Purifies the body, the touch of the sands and water of this place glorifies the purified body, visit to the shrines in the pedestals around the main Temple takes away all evil influences from the mind and visit to the presiding deities of the Temple from behind the sacred Garuda Stambha with absolute faith immortalises the soul.

3. Indrabala otherwise known as Indradyumna, son of Udayana of Pandu dynasty worshipped the Lord Jagannath then known as Nilmadhab in about 484 B. C. with the help of Adibasis of this place. About 80 years thereafter Mahapdmananda became attracted to the deity and stole it away to Magadha. In the 1st Century B.C. Kharabela the then king of Kalinga invaded Magadha and took back the deity and established it in its present place and in course of time the worship of the deity fell into the hands of Savaras. Jajati keshari raised a temple for this deity in 824 A. D. but it was withered

away shortly after its construction due to saline action. Subsequently in 1100 A. D. Ananta Barman Chodagang of Ganga dynasty commenced construction of the present temple. His grand son Ananga Bhimadeb completed it at the expense of 12 years income of ancient Orissa. The configuration of the Temple as it was originally it stands as it is today without any Change.

4. It seems the Temple was constructed at a time when the architectural skill of the local artisans was not much developed as in the latter year when the Temples of Bhubaneswar and Konark were built. It is, however, certain that this Temple was constructed with strict adherence to the cannons of Shilpa Shastra which originated from Biswakarma son of Lord Brahma. The main temple is divided into four parts called [1] Bimana [2] Nata Mandir, [3] Jagamohan and [4] Bhogamandap and it is surrounded with a court-yard called Bhitara Bedha or inner premises and in the periphery of the inner premises the shrines of all other deities are located. The inner premises has a compound wall and the Bahara Bedha or outer premises is situated outside this compound wall in the outer premises many shrines, Anand Bazar, garden, kitchen etc.

are located. The outer circle has also a compound wall called 'Meghanada Pacheri' which is 22 feet high and 6. 5. feet wide. the temple has four main gates, the eastern gate is called the Sinha Dwar or the Lion's Gate. The Northern gate is known as Swarga Dwar and the other two gates are southern or Dakkhina Dwar and western or Paschimdwār. The height of the main temple is 214 feet from the main road. In its summit there stands fixed the discus called Nila Chakri' which Lord Srikrishna used in Mahabharat Yudhha to smash all 'Adharma'

5. The Hindu scriptures have described only four places in India which are important as pilgrim centres and individuals attain purity of soul by visiting these four places. Out of these four places Puri is most important as the shastras prescribe that Puri is to be visited after visiting the other three places for attaining Tirtha benefits. These four places are [1] Badrinarayan (2) Dwaraka [3] Rameshwar and [4] PURUSOTAM or Puri. It is said that Lord Jagannath takes his bath in Badrinarayan, dresses in Dwaraka, food in Puri and bed at Rameshwar. The food which the Lord takes is of very Rajasik type and all the Dhupa menus in the Jagannath Temple, Puri has, therefore

been prescribed to be of different varieties and of highest quality according to seasonal requirements for maintaining health on the principles of Ayurveda.

6. The mangament of the Temple ever since its construction was in the hands of the successive rulling chiefs of Orissa and lastly it came to the Gajpati Kings of Khurda later known as Raja of Puri. From 1960 the management of the Temple vests upon a Committee, formed by the State Government under the provisious of sri Jagannath Temple Act. 1955 of which the Raja of Puri is the Chairman. The Additional District Magistrate, Puri is the Secretary of this Committee and Administrator of the Temple.

7. There are 36 types of Sevaks [Service holders] who perform different types of Seba to the deity in the Temple and they are all hereditary. Each has separate function and independent of others. All types of sevaks have therefore to join hands for attending to the Niti rituals of the Temple every day. These Sevaks enjoy all the food offerings of the Committee to the deities in prescribed proportions.

8. Puri is Otherwise known as 'Tirtha kendra' or a centre of sacred places. A devote visiting puri must see all these sacred places, breath its air, take bath where possible and pray to the Gods whereby he Purifies his body mind and soul. Among the sacred places the following are important.

1-Markanda Tank

Religious minded devotees first take their bath in the sweet waters of Markand tank. The waters of all the sacred rivers of India have Jo ned here and so its water is considered as sacred and pure. This tank exists from the time of Mohapraeay.

2. Mahodadhi (Sea)

The waters of Indian ocean coming through the Bay of Bengal touches the northern limits of Puri town and by the churning of thease water of the ocean the gods in the past got Mahalaxmi, Amrita and Poison. Mahalaxmi was offered to Lord Jagannath Amrit was distributed among the Gods and the poison was taken by Lord Siva to save the Universe from destruction. A bath in the sea is therefore, sacred and apart from its medicinal utility it has religious sanotity. A dip in the sacred

sea brings in broadness of mind doing away with all meanness. Tarpan is also done here by the devotees.

3. Rohini Kunda inside the Temple

This Tirtha is located near Bimaladevi Temple, in this Kunda one can see the Chakra and a crow with four hands. After the construction of the Temple Maharaja Indradyumna went to invite Brahma for the inaugural ceremony. In his absence, one Galmadhab Raja occupied the Temple and worshipped Madhaba. When Indradyumna came back, Galmadhaba quarrelled with him and the dispute was settled in favour of Indradyumna by Lord Brahma after taking evidences from a crow and a tortoise. The crow and the tortoise were immortalised for their truth. The earliest God Nilamadhab was worshipped with the water of the kunda and so it is considered pure.

4. Kalpa Bata inside the Temple

This is a Tirtha located near Mukti Mondap. The banian tree is as old as the temple. It is said that Lord Jagannath takes his

sleep in a leaf of this tree when there is Mahapralaya. Devotees worship here for getting child All desires are fulfilled if one sits under this tree and offers Pindatarpan.

5-Sweta Ganga.

It is a tank located on way to the Swarga dwara from Lion's Gate. After sea bath devotees take their bath here. The tank has get under current from the Ganges. It is therefore considered a Tirtha.

6-Indradyumna Tank

From Markand tank the devotee proceeds to this tank for a sacred dip to further purify his body and a Tarpan is also offered here. The action of the water of this tank on the body is only to be felt and its efficacies believed. The water of Mandakini Ganga bes in this tank.

These three bathing places and visit to Kalpa Bata in the Jagannath Temple and Lord Balabhadra and Lord Jagannath are the five main Tirthas and Debatas of Puri.

7-Narendra Tank

This tank is famous as it is the Keli Sarobara of the Lords. The Chandan Jatra festival of the Lords is observed here. Narendra Deb son of Kapilendra Deb left his kingdom to the charge of his brother Purusottam Deb and spent all his belongings in constructing this tank and stayed on its bank with his wife till death. The waters of this tank have got their purity by the boating games of the Lords during Chandan Jatra. Devotees do not therefore forget to sprinkle its water over them or have a bath in it also.

A walk in the Temple of Shri Jagannath and in the Bada Danda has a lot of religious importance. Each Dust particle of this great road is full of atomic energy and so much so a walk over it enchants the devotees towards the main gate of the Temple removing from his mind all his worldly attachments for a moment. He sees from a distance the Nilachakra or discus in the summit of the Temple and bows his head thinking its to opposite qualities of a Saviour and Destroyer. The Chakra saves one who follows truth from all evil influences on him and destroys one who commits

Adharma in any form Any body who puts a red flag over this Nilachakra brings to him all the prosperity in life. The places and shrines to be visited on coming to the main gate of the Temple have been described below in serial order and visits conforming to that order have its religious benefits.

1-Aruna Stambha

The Marhatta rulling chief of Orissa. Bali Brahmachari shifted this pillar from Konark and in stalled it at this place. This denotes Aruna Darsan 1, e. Jyotilaka. In other words the energy of the Sun God is concentrated in this pillar and devoteds touching the pillar get sufficient energy and strength ofmind to approach Lord Jagannath

Prachir. It is 22 feet high and 6.5 feet wide and it runs round the Temple premises. This Pacheri has the quality of restricting passage of sound waves emanating from the roaring of the sea to enter in to the Temple.

The legend indicates that once Lord Jagannath and Mahalaxmi fell in to love quarrels and Lord Jagannath chastised that Her ocean father is a roaring God and for that her daughter is quarrelsome As a protest against this insult Mahalaxmi gave the Meghanad Pacheri the quality of restricting outside sound in to the Temple Each stone of the temple is therefore physically sound proof and Posses celestial quality and devotees bow low before this Prachir while entering in to this Temple.

In each step of the 22 steps he has to give up with prescribed Yogasadhana the vices one after the other. In this manner he has to proceed step by step and when he reaches the last step he gets in to perfection. The 22 steps have, therefore, got the qualities of talking away all the vices from the devotees who get in to the Temple with absolute faith.
